

# EXPLOSION SUPPRESSION & ISOLATION

## Protects:

- // Bucket elevators
- // Spray dryers
- // Dust collectors
- // Filters or cyclones
- // Mills
- // Silos, hoppers, conveyors

**Available in two sizes:**

- 2.6 gal (10L) / 15.4 lbs (7kg) capacity
- 5.3 gal (20L) / 30.9 lbs (14kg) capacity

## KEY ADVANTAGES OF RAPTOR X<sup>®</sup>

- Designed to prevent explosion propagation in complex industrial process systems
- Non-pressurized bottles
- Fast gas generator activation with no risk of accidental activation
- Uses food-grade extinguishing powder
- Less maintenance with easy on-site assembly

### EXPLOSION SUPPRESSION

#### Explosion Suppression

- ✓ Designed for direct discharge
- ✓ Direct flanged mounting to equipment
- ✓ Even powder distribution via integrated spreader
- ✓ Available in vertical and elbow (bend) configurations

### EXPLOSION ISOLATION

#### Explosion Isolation

- ✓ Multiple injection points (2-4 hoses)
- ✓ Multiple hose length options
- ✓ Pre-engineered design, reducing engineering time & project complexity
- ✓ Easy installation- no structural stands
