

EV-VF VigiFlap

APPLICATIONS

The **VigiFlap** is an explosion isolation valve designed to prevent propagation of overpressure or flame front caused by an explosion downstream in vessels such as dust collectors, cyclones, and filters.

The valve is held open either by air flow or proprietary locking mechanism. As a result, the **VigiFlap** valve can be used as an explosion isolation device for both the inlet and outlet of a vessel.

The **VigiFlap Explosion Isolation Valve** complies with **NFPA** guidelines and is an **ATEX Certified** device for the containment of explosion.

CERTIFICATIONS & STANDARDS

EN 16447

NFPA 69

STANDARD FEATURES

- Body : painted steel
- 100% stainless steel AISI 304
- Diameters : $\phi 6"$ to $\phi 52"$ / $\phi 160$ mm to $\phi 1320$ mm
- Gasket : EPDM (Silicone FDA 392°F/200°C option)
- Pressure drop : Lower pressure drop with round domed flap

OPTIONAL FEATURES

The EV-VF is 100% NFPA 69 compliant with the following optional features :

- **Body** : Galvanized steel
- **Body** : Stainless steel
- **Frame silicone FDA** : 392°F/200 °C
- **Accumulated dust level** : Dust level sensor to prevent dust accumulation
- **Connection box** installed on the body, according to the ATEX zone (opposite side of the locking mechanism)

PRODUCT CODE: 50200

* Units in inches rounded to the closest whole number

MINIMUM INTERNAL DUST ACCUMULATION

The VigiFlap's unique inlet & outlet "Straight Through" design ensures very low static resistance and reduces dust accumulation.

FREE FLOW DESIGN

Explosion Isolation Valve EV-VF VigiFlap

PROCESS FLOW POSITIONS

PROCESS FLOW

FLOW POSITIONS :

1 Flap is held open by process flow

Installation
with
floating flap

2 Flap locked in open position

Locked
open flap for
dirty airside

or

Locked
open flap for
clean airside

Installation
with flap
locked open

EXAMPLE DURING AN EXPLOSION EVENT

Explosion isolation is achieved by flap closure independent of being in free floating or locked open position

Manual locking mechanism reset is required

EV-VF VigiFlap TYPICAL INSTALLATION EXAMPLES

THE VigiFlap EXPLOSION ISOLATION VALVE IS DESIGNED FOR USE ON THE INLET AND OUTLET SIDES OF A FILTER OR VESSEL

PROCESS FLOW (Flap is always set in the open locked position when installed on the clean air or positive pressure side of a filter)

DEFLAGRATION EXPLOSIVE EVENT
